Contents of Volume 41

No. 1

R.I. Davis, W.A. Ahroon and R.P. Hamernik (U.S.A.)
The relation among hearing loss, sensory cell loss and tuning characteristics in the chinchilla 1

E. Kaukoranta, M. Sams, R. Hari, M. Hämäläinen and R. Näätänen (Finland)
Reactions of human auditory cortex to a change in tone duration 15

R. Rado, M. Himelfarb, B. Arensburg, J. Terkel and Z. Wollberg (Israel)
Are seismic communication signals transmitted by bone conduction in the blind mole rat? 23

J.O. Pickles, J. Brix, S.D. Comis, O. Gleich, C. Köppl, G.A. Manley and M.P. Osborne (Australia, U.K., F.R.G.)
The organization of tip links and stereocilia on hair cells of bird and lizard basilar papillae 31

J.W. Conlee, S.S. Gill, P.T. McCandless and D.J. Creel (U.S.A.)
Differential susceptibility to gentamicin ototoxicity between albino and pigmented guinea pigs 43

W.S. Quirk, H.A. Dengerink, J.K. Coleman and J.W. Wright (U.S.A.)
Cochlear blood flow autoregulation in Wistar-Kyoto rats 53

M.B. Sachs, R.L. Winslow and B.H.A. Sokolowski (U.S.A.)
A computational model for rate-level functions from cat auditory-nerve fibers 61

I.H.M. Van Stokkum and C.C.A.M. Gielen (The Netherlands)
A model for the peripheral auditory nervous system of the grassfrog 71

Announcement 87

Nos. 2/3

A.R. Cody and D.C. Mountain (Australia, U.S.A.)
Low-frequency responses of inner hair cells: evidence for a mechanical origin of peak splitting 89

D.C. Mountain (U.S.A.)
Measurement of low-frequency receptor potentials in inner hair cells: a theoretical analysis 101

J.A. Kaltenbach, P. Gochin and G.L. Gerstein (U.S.A.)
Spectral time-course analysis of firing patterns in the dorsal cochlear nucleus 107

B.H.A. Sokolowski, M.B. Sachs and J.L. Goldstein (U.S.A.)
Auditory nerve rate-level functions for two-tone stimuli: Possible relation to basilar membrane nonlinearity 115

S.M. Novoselova (U.S.S.R.)
A possibility of sharp tuning in a linear transversally inhomogeneous cochlear model 125

C.W. Parkins (U.S.A.)
Temporal response patterns of auditory nerve fibers to electrical stimulation in deafened squirrel monkeys 137

G.J. Swanson, S. Nomura and B.L.M. Hogan (U.K.)
Distribution of expression of *2AR (osteopontin)* in the embryonic mouse inner ear revealed by in situ hybridisation 169

R.D. Chambers, M.L. Matthies and S.K. Griffiths (U.S.A.)
Correlations between various measures of head size and auditory brainstem response latencies 179

T.E. Billett, P.R. Thorne and J.B. Gavin (New Zealand)
The nature and progression of injury in the organ of Corti during ischemia 189

H.P. Wit, P. Van Dijk and J.M. Segenhout (The Netherlands)
DC injection alters spontaneous otoacoustic emission frequency in the frog 199

E.A. McFadden and J.C. Saunders (U.S.A.)
Recovery of auditory function following intense sound exposure in the neonatal chick 205

K.E. Rarey and W.G. Luttge (U.S.A.)
Presence of type I and type II/IB receptors for adrenocorticosteroid hormones in the inner ear 217

R.P. Carlyon (U.K.)
Changes in the masked thresholds of brief tones produced by prior bursts of noise 223

K.I. McAnally and M.B. Calford (Australia)
Spectral hyperacuity in the cat: neural response to frequency modulated tone pairs 237

A.J. Flynn, W.S. Quirk, H.A. Dengerink and J.W. Wright (U.S.A.)
The effects of intracerebroventricularly administered angiotensin II on blood pressure and cochlear blood flow in rats and guinea pigs 249

A. Berkowitz and N. Suga (U.S.A.)
Neural mechanisms of ranging are different in two species of bats 255
